SUMMARY

Third-year B.Tech Computer Science and Engineering (Artificial Intelligence) student at Vishwakarma Institute of Technology, Pune (CGPA: 8.84) with hands-on experience in AI/ML, mobile application development, and AR/VR solutions. Passionate about building real-world products at the intersection of AI, software engineering, and immersive technologies. Experienced in leading technical initiatives as General Secretary of IEEE VIT Pune and driven to develop scalable solutions that create meaningful impact.

EDUCATION

Vishwakarma Institute of Technology
Computer Science and Engineering (Artificial Intelligence)
CGPA: 8.84

Pune
2024-2028

WORK EXPERIENCE

App Developer Intern
Bandhavgarh Tiger Reserve

Pune
Dec 2025 – May 2026

- Developed a Flutter-based booking platform used for visitor registration and reservation management.
- Integrated Firebase for real-time synchronization and efficient booking workflows.
- Designed and implemented automated slot allocation and FCFS reservation mechanisms..

SKILLS

- Languages: C++, Python, SQL, Dart
- Frameworks & Libraries: FAISS, XGBoost, Sentence Transformers, OpenCV, Flutter, Flask, LangChain
- Developer Tools: Git, GitHub, Firebase, Google Colab, Jupyter Notebooks
- Databases: MySQL, Firebase Firestore

PROJECTS

Aletrix – AR Solutions for Businesses | AR & APP Developer

May 2026 – Present

- Co-founded Aletrix, a startup developing customized Augmented Reality (AR) solutions for businesses.
- Leading AR application development, product architecture, and backend integration while converting client requirements into scalable solutions.
- Contributing to product planning and technical strategy to build immersive business applications.

Sahyog – AI Disaster Relief Platform:

Nov 2025 – May 2026

- Built a tri-app disaster response system with AI-based SOS prioritization using risk severity, population density, and resource availability.
- Integrated **Google Liquid Galaxy** for immersive geospatial visualization of disaster zones with custom KML overlays

AI-Powered Pre-Delinquency Intervention Engine:

Feb 2026 – Mar 2026

- Predicted loan default probability 2–4 weeks in advance by analyzing 30+ behavioral signals including salary shifts, credit utilization, and spending volatility using rolling 7/14/30-day trend windows.
- Built a Risk Fusion Engine combining Gradient Boosting and XGBoost outputs to generate a unified Financial Stress Index and classify customers into Low, Medium, High, and Critical risk tiers.

ACHIEVEMENTS

- National Hackathon Winner for developing Sahyog, an AI-powered multi-disaster relief and response platform integrated with Google Liquid Galaxy.
- Patent Published: "Gen-AI Powered Healthcare Assistant for Chronic Disease Prediction and Medical Support", Intellectual Property India, 2026 (Application No: 202521113739).
- IEEE APP Project Team Member, contributed to Flutter and Firebase-based application development through hands-on technical projects.
- Organized a multi-day technical workshop on Large Language Models (LLMs) for 200+ students.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

Joint Secretary
IEEE Student Branch, VIT Pune

June 2026 – Present

Department Representative
Vishwakarma Institute of Technology, Pune

Jan 2025 – June 2025
